

**\*\*\*NEW PRODUCTS NOW AVAILABLE \*\*\***

**INTEGRAL BLINDS:**

**Blinds are available in three types:**

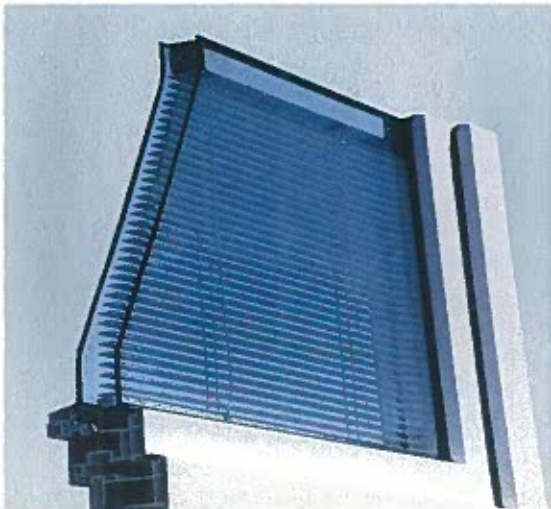

1. Venetian
2. Pleated
3. Roller

**How it works?**

The blinds are encapsulated within two panes of glass e.g. a sealed unit. The workings of the blind do not compromise the insulating properties of the sealed unit, and therefore operates in a totally sealed environment.

**Benefits:**

1. Total protection against dirt, dust and weather conditions
2. This therefore means no maintenance is required after installation.

**Applications:**

Blinds can be used in both residential and commercial environments, for example anywhere from conservatories to hospitals and office blocks.
